## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 29 and 30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 21 of U.S. Patent No. 6,651,905 in view of Beamer.

Claim 29 of the instant application cites a sprinkler head comprising a base, an elongated stem, a nozzle, a shaft, and a throttle control member, which are fully disclosed in claim 21 of the '905 patent. However, claim 21 of the '905 patent does not teach the throttle control member comprises a polyurethane thermoplastic elastomer. Beamer discloses a sprinkler head with a nozzle insert 62 being made by polyurethane material. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of the '905 patent with a throttle control member comprises a polyurethane thermoplastic elastomer as suggested by Beamer. Doing so would provide a resilient material that against abrasion (see column 7, lines 48-53).

### *Allowable Subject Matter*

3. Claims 1-28 are allowed.

**Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6,457,656 to Scott is cited to disclose a sprinkler head with velocity control disc 122 and valve member 128 being made from elastomeric material.
